

SIBI VENGATESAN

Java Full Stack Developer

+91 9500746841 | sibi772001@gmail.com | [GitHub](#) | [LinkedIn](#) | Chennai, India

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience in Spring Boot, Angular, RESTful APIs, and PostgreSQL. Experienced in developing enterprise applications, optimizing backend performance, automating business workflows, and building scalable full-stack solutions in Agile environments. Skilled in designing secure, maintainable, and high-performance applications by following industry best practices and clean coding principles.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript.

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, REST APIs.

Frontend: Angular, HTML, CSS.

Databases: PostgreSQL, Oracle, SQL.

Tools: Git, GitLab, Postman.

Methodologies: Agile/Scrum.

WORK EXPERIENCE

Associate Software Engineer | Inspirisys Solutions Limited

Chennai, TN • Mar 2025 – Present

Environment: Java 21, Spring Boot, Angular 20, PostgreSQL, Oracle, REST APIs, Spring Batch, Git, GitLab, Postman, Agile

- Enhanced and maintained enterprise web applications using Java, Spring Boot, Angular, and PostgreSQL, delivering scalable business solutions.
- Implemented server-side pagination using Spring Boot and PostgreSQL (LIMIT/OFFSET), reducing API response payload size and improving load time by ~60%.
- Developed Spring Batch jobs and scheduled workflows using Spring Scheduler to automate compliance processes and handle large-scale data operations.
- Designed 20+ RESTful APIs following HTTP standards (status codes, request validation, response structuring) for scalable client-server communication.
- Integrated new features and 5+ business modules while following clean coding standards and industry best practices.
- Collaborated with cross-functional teams in an Agile environment using Git and Postman for version control and API testing.

KEY ACHIEVEMENTS

- Improved API performance by ~60% using server-side pagination.
- Resolved 30+ critical backend issues in production environment.
- Developed automated batch workflows for compliance processing.
- Delivered production-ready features with zero critical deployment issues.

KEY PROJECTS

Komply360 – Compliance Management Mobile Application

Environment: Java 21, Spring Boot, Flutter, Angular 20, PostgreSQL, Oracle, REST APIs, Spring Batch, Git, GitLab, Postman, Agile

- Developed a compliance management mobile application using Flutter and Spring Boot, enabling efficient tracking of tasks, statuses, and regulatory processes.
- Built secure and scalable REST APIs with JWT-based authentication and integrated Flutter frontend for real-time data synchronization.
- Designed optimized PostgreSQL database schemas and implemented dashboards with filtering and status insights for effective compliance monitoring.
- Integrated form validations, error handling, and user-friendly notifications to enhance application usability and reliability.
- Worked with Git for version control and collaborated with team members using pull requests and branch management.

GBS – Government Business Suit's

Environment: Java, Spring Boot, Angular, Oracle, REST APIs, Git, GitLab, Postman, Agile/Scrum

- Modernized enterprise applications by migrating legacy AngularJS and Java applications to the latest technology stack.
- Refactored frontend and backend components to enhance performance, maintainability, and scalability.
- Developed responsive business modules and reporting features using Angular and Java.
- Fixed production issues and optimized existing functionalities to improve application stability and user experience.
- Collaborated with cross-functional teams to deliver high-quality solutions in an Agile environment.

EDUCATION

Master of Computer Applications (MCA) — Dhanalakshmi Srinivasan College of Engineering & Technology, Anna University May 2025

CERTIFICATION

Anudip Academy — Advanced java programming

CIN: U74900HR2009PTC039529
